VISTA THERM *Elite SE*[®] THE EVOLUTION OF GLASS

Innovation and Thoroughness – A Company with a Proven Pedigree

For over forty years, the success of Carey Glass has been built on a foundation of excellent customer service coupled with solid investment in the best people, facilities and ideas. This strong foundation has led to our continuing success and our very good reputation.

Carey Glass is focussed on achieving the highest levels of quality. These standards are attained through world-class manufacturing practice, timely distribution and an on-going commitment to thoroughness.

Carey Glass prides itself on its forward thinking. The development of our elite Low E glass with its unique 1.1 u-value has proven a huge success. It is the market leader, Low E glass consistently being specified by architects, leading window companies and house builders throughout Ireland and the U.K.

After further research and development and large-scale investment in the most up-to-date machinery, Carey Glass now brings Elite SE to the market. Elite SE is a triple-glazed unit boasting 2 no. unique elite coatings, with both cavities filled with Krypton gas. The result of this design is a u-value of .7 w/m²k. Elite SE units are ideal for using in wooden, uPVC and alu-clad windows, and will enhance the energy rating of all windows greatly.

GLASS TYPE	U VALUE
Standard	2.5
K	1.7
Elite	1.1
Elite SE	0.7

The Carey Glass plant, Nenagh, Co. Tipperary, Ireland.

Light Reflection (Pv)	17
Solar factor (g)	57
Colour Rendering - RD65 (Ra)	98

Glass that's different

Elite SE is the first soft-coat, low-e triple-glazed unit made available to the window market. In September 2007, after months of development and testing, a u-value of .7 was confirmed in the laboratory.

2 Elite coatings combined with krypton gas in both spacers and, of course, our usual double seal unit all combine to achieve this amazing u-value. With Elite 1.1, Carey Glass managed to create the most popular and most specified low-e glass on the market. Now Elite SE with its .7 u-value can be added to this unrivalled range.

This highly energy-efficient unit is now being manufactured in our Nenagh plant. Elite SE will enhance the overall u-value and energy rating of any window type.

What better way to reduce fuel costs?

What better way to bring comfort to a new level?

What better way to improve your house energy rating?

Specify and insist on the best.

Elite SE triple glazing from Carey Glass
